Residents are fully trained doctors (MD's) who are doing their two year training (residency) in family medicine, and the Gabriola Medical Clinic is one of the locations they can choose. Drs Thorne and Cusack are part of the UBC Family Medicine training program and will be preceptors to the new MDs who have chosen to specialize in family medicine.

The Foundation and the Gabriola Medical Clinic recently teamed up and hosted 12 Residents from UBC's Postgraduate Family Practice Residency Program in Nanaimo. The group toured the Clinic and saw some of Gabriola's hot spots including Twin Beaches, the Commons, and Drumbeg, and stayed for a social hosted by the Foundation. BC Ferries provided travel vouchers.

The Foundation is pleased to be collaborating with the Clinic to introduce these doctors who want to make a career in family medicine to our community, and to the lifestyle we all enjoy. We hope in building a relationship early in their careers that some may choose to live, work, and build a life here on Gabriola.
